

Charlie Kirk Assassination Evidence

2026.10.06

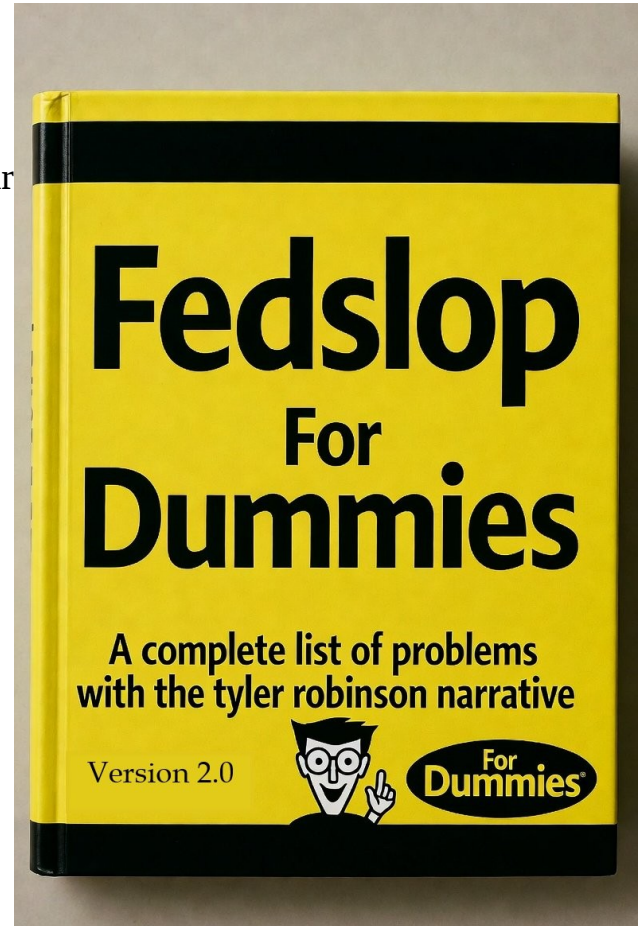

Assassinated by Pentagon and special agents on September 10th, 2025

Shot from behind, above right, into head, near neck. Exit wound neck down left.

100% sure not with a 30.06 riffle from front.

Some of the most important investigators :

WeAreNotGoingToMars: <https://x.com/WeAreNotGTM>

Agrees with @RedsRandumbRuminations and many others on shot in the head right, behind, because that is just too evident. He favors **shot with a drone**.

3 Patsies, 2 simultaneous shooters 2 distractions

And important: **although second simultaneous shot in the breast** with a mini palm pistol (or something not known from front/below.) Rick Cutler detonates something. The second shot counterbalances the shock and makes him fall behind, sideways.

<https://x.com/WeAreNotGTM/status/2106439450347606158>

Terryl Farnsworth's footage from behind Charlie Kirk's head, ..Charlie was shot in the right rear portion of his head, and it exited out of the left portion of his neck. ..

Charlie's neck bulging past his shirt on the left side, coupled with the indentation in his head.

I also discovered the military thermal/infrared tracking technology on Charlie's head.

Along with that discovery, I also found the blood spatter from the impact of the round hitting the right-rear portion of Charlie's head.

And now I am showing you the clear bulge of his neck on the left side, denoting **DOWNWARD NECK CAVITATION** from the shot to the head.

The hole in Charlie's neck, that appeared well **AFTER** impact, was an **EXIT**, not an entrance...

Two shots impacted Charlie Kirk at the same time.

The first was in his head, exiting his neck.

The second was his chest, exiting his back.

In the series, I've mapped out both shots and where they impacted Charlie Kirk.

Just like in this still frame photo, I've proven the entry and exit of both shots.

The super small concealed pinfire shot that impacted Charlie in the chest, exiting his back, was a smaller shot that was simply meant to push him back from the momentum of his body moving to the left from the Bird of Prey drone shot that struck him from the right.

The smaller caliber shot to the chest left a hole in his shirt, and also bruising with blood, from the impact and hole in his chest under his shirt.

The small caliber shot caused a tiny hole in Charlie's shirt as it exited out of his back.

The 2mm hole was visible by Dan Flood as he took Charlie to the ground after the shots.

<https://www.youtube.com/@RedsRandumbRuminations>

Forensics: 100% shot from behind above right, exit left neck down, as we can clearly see.

<https://www.youtube.com/watch?v=fxvud0iqyUw> debunking other theories, like the mic theory.

<https://www.youtube.com/watch?v=Rp0qxiK77bs> and other vids.

(says Baron Coleman maybe deepstate, hmm).

COMPLETE LIST OF FED SLOP ISSUES (V 2.0)

Will keep this pinned to the top of my profile

His security team doing hand signals the whole time which they had never done before at prior events. Rick Cutler even seems to be counting down to the assassination.

Utah FBI Field Officer fired a month before incident and new one installed by Kash Patel.

The most suspicious character of all, Rick Cutler, flies in from Guatemala to Volunteer for 1 day. He has ZERO history with TPUSA. He came in for the one event where Charlie died and most likely left the country afterwards. (ZERO questioning)

Charlie is seated on an elevated platform despite being over 6 feet tall, something they have never asked him to do before. Platform sits 3 feet or so above normal level. No one is questioned about this.

Charlie gets hit and goes down.

Damage completely inconsistent with a 30-06 and has no exit wound. They know it makes no sense, so they make ridiculous stories about Charlies "Superman Neck" and say it's a "Modern miracle".

Farnsworth focuses on removing the camera behind him (tampering with the crime scene). The other guys hop the barricade and start grabbing and pocketing random items from the crime scene.

NOBODY IS WORRIED ABOUT MORE SHOTS FIRED. No guns are drawn despite active shooter situation. Security team does not act like they are under fire. It's like they all know the one shot was the only shot, and they were all safe.

Security guys kneel all around Charlie while he is bleeding out on the floor, security guys are smiling/grinning. This is photographed and all over X.

Security team waives off EMT assistance, opts to take Charlie themselves in the shady SUV instead as covered on Baron Coleman's show.

GEORGE ZINN says "I SHOT HIM", creates a diversion. Fake patsy. Seemingly planted himself as to confuse things. This points to an operation with bigger players involved intentionally shrouded in confusion.

Security team carries Charlie like a sack of potatoes, not like their client bleeding out from the neck. No head or neck support at all.

Separate video surfaces of Hunter Kozak practicing his reaction to Charlie's death before it happens. Hunter has the identical reaction to the

acting when Charlie is hit. !!! ARRIVAL TO THE SUV !!!

If the security team DID just murder Charlie, now they have the opportunity to conceal evidence or plant evidence in the privacy of the back of the SUV. -- Here could be where they destroy the RODE microphone, destroy the FREEDOM shirt, and even plant metal fragments inside the neck wound. If Charlie was still alive at this point, they could

finish him off. !!!

They don't go to the closest hospital which is not what you would do to save his life.

All of their stories about what happened in the car are farfetched and don't match one another.

They communicated with Ben Shapiro's security team as disclosed by Ben Shapiro. Focus should be on the receiving hospital to maximize chance of saving Charlie's life. Any argument justifying talking to Shapiro's team is ridiculous. They could connect AFTER Charlie is being treated at the hospital. Shapiro is an IDF asset, and this point reinforces the Israel theories 100%.

They made sure there was ZERO footage of the arrival and time at the hospital.

Mysterious items on floor of car in photographs. No explanation for any of it. Black fragments that support shaped charge theory. Piece of possible burnt t-shirt which would support the missing FREEDOM shirt.

FREEDOM shirt said to have been cut off Charlie. IT IS NOW MISSING. Key piece of evidence will never be seen again. Item could be tested for explosive residue to dispel conspiracy theories. Mysteriously

disappearance reinforces theories.

AFTER DEATH

SUV is stripped and sold off instead of being held as evidence for forensic analysis blocking the possibility of any real investigation. [This being allowed to begin with should be all anyone needs to know what is going on]

Erika immediately appointed CEO. "It's what Charlie wanted". Most organizations have clear succession through documentation. TPUSA puts out AI slop video of Charlie saying "Erika would do a great job". Internet calls out fake video and TPUSA says they were just trolling. They never show real proof.

Benjamin Netanyahu makes statement immediately saying "Israel didn't do it". I already thought they did. He didn't need to sell me on it.

Text messages between Tyler Robinson and Lance Twiggs emerge and sound like a cheesy love story written by federal agents covering all bases

of statements for confession of crime. ✓ Gun not found by police even with trained dogs sniffing the campus. FBI shows up and conveniently find the gun in minutes.

✓ AES Plant in Tennessee with actual production project to create an anti-personnel shaped charge that perfectly fits assassination timeline is blown up killing 16 people on 10/10/25.

✓ Screwdriver originally said to have been found with gun in early reporting before shifting to saying it was found on rooftop. Screwdriver not compatible for assembling/disassembling rifle.

✓ Security team is not questioned or treated as suspects at all. Spouse is also not questioned at all. In high profile murder case with celebrities like this the spouse is usually prime suspect.

✓ SECURITY TEAM NOT FIRED DESPITE CATASTROPHIC FAILURE LEAVING THEIR CLIENT DECEASED. They are instead promoted. For some reason Erika trusts them all to protect her life and the life of her kids.

✓ PAVER EMERGENCY. Just days after shooting, entire crime scene excavated. 10 inches of dirt removed and permanent concrete pavers installed over entire scene at request of FBI and Utah Governor. No forensic analysis of dirt performed. Any residue or smaller caliber bullets that potentially could have been found now never will be pointing at cover up.

✓ Key evidence handed back to Spouse instead of included in investigation. Necklaces. Phones, etc. [This seems like a running theme with this assassination. Key evidence is lost or not included and evidence that can easily be fabricated is treated as the gospel]

✓ GOOGLE Searches revealed in the weeks prior to assassination from both USA and Israel of many key players and locations. Google takes steps to remove this proof, but its all over the internet from people saving it.

✓ Inconsistencies around Tyler Robinson's height in footage start to form. DiligentDetizen traveled to UVU and did height comparison in hallway.

Behavior of TPUSA and Erika both very bizarre. Most of us still felt Erika was a helpless victim at this point.

Erika Films video over his casket for social media. Video possibly filmed by Stacy Sheridan VERY strange. [Leaves most on internet feeling very strange about everything]

TPUSA and Erika both start getting caught in lies and looking VERY suspicious. Internet really starts digging into all the other details. Grieving widow narrative starts to fall apart.

Blake Neff and Andrew are crashing out on X and acting VERY nervous. Posts are getting more frequent and conveying more anxiety.

Influencer campaign to lie about Tyler Robinson ramps up and is blatantly obvious. It slaps everyone in the face. "we saw a video in court showing TR take the shot" "the evidence is overwhelming" "he did it". Everyone is pushing the narrative.

Footage shown in preliminary hearing is obviously degraded intentionally. Cameras has higher definition 25 years ago. Tyler Robinson is a few pixels on the screen. No one is identifiable in any UVU footage. It seems to be by design.

Tyler Robinson car inconsistencies with body trim and exhaust between cars shown in different footage and photographs.

Salem Media / Zionist types like AIPAC Shakur

[@TheOfficerTatum](#)

start campaign to attack conspiracy theories and support Fed slop narrative. Campaign ramps up quickly with other influencers jumping on. "Candace Owens is demonic" starts polluting X.

Campaign to attack those asking questions intensifies. You can feel the millions of dollars being poured into it. Most influencers sell their souls. Benny Johnson

[@bennyjohnson](#)

/ Tim Pool

[@Timcast](#)

types jump in. "Candace Owens is more demonic from the pits of hell".
"Candy Cult" charge starts picking up steam.

Everyone is attacking everyone asking questions. Candace Owens is just one of many. You are not allowed to have questions. Questioning TPUSA and Erika is EVIL. ITS DEMONIC.

Influencer efforts ramp up even more to blatant lies. Jack Posobiec
[@JackPosobiec](#)

types jump in. "We saw a 4k video of Tyler Robinson taking the shot!" "We

have 200 Terabytes of footage of Tyler Robinson!"

HONORABLE

MENTIONS

Many tall slender men with similar hair all wearing maroon shirts all over UVU campus that day appearing like a military color-coded op.
[Appears to be more intentionally installed confusion]

Photograph of Erika Stepbrother goes absolutely viral because he looks exactly like Tyler Robinson with a hat and glasses on and is around the same height.

Lance Twiggs is getting immunity and cannot be cross-examined despite having fingerprints on the gun, towel, and screwdriver. He should be a key suspect.

Lance Twiggs is positioned as transgender and a furry from the very beginning but in court makes no attempt to appear or sound feminine at all.

Donald Trump is asked about Charlies tragic death in an interview and he instantly changes the subject to talk about "the ballroom".

As usual, let me know what you think should go on the list and I will add it to the next round.

SHARE IT FAR AND WIDE. LETS BLOW IT UP. References (Will add more to comments)

Post Text:

Hypothetically speaking.. What if the evidence indicated that POTUS, Hegseth, Rubio, Vance and Ratcliffe conspired to have Charlie Kirk eliminated, in the best interests of "Peace in the Middle East" and the National Security of the USA, wrt Iran? Did Charlie get in the middle of something way over his pay grade? Roughly 90 days before Charlie was killed, June 8th, 2025, POTUS and the crew head to Camp David, for the first time this 47th Presidency, and the only visit in 2025. Tulsi Gabbard is not in attendance. I suggest this was the meeting where eliminating Kirk was planned and green-lighted, in order to secure the Gaza Peace deal. HADES was the Command and Control. Israel's Elbit would do the wet work. I suggest Bibi promised Trump a Peace deal / Cease Fire within 30 days. That's exactly what happened. Trump flew to Sharm El Sheik to sign it.. New Gaza and the Board of Peace can proceed. We killed Kirk. POTUS, Hegseth, Rubio, Vance and Ratcliffe. So, Kash Patel isn't going to investigate a damned thing. Happy to debate it.. 4:02 AM · Sep 23, 2026

High electic voltage circuit thesis:

(This does not exclude a simultaneous shot from behind).

https://wtshesaid72.substack.com/p/charlies-internal-injuries-hypothesized?r=6i3u4e&utm_medium=ios&utm_source=notes-share-action

<https://x.com/wtshesaid72/status/2098910278142644347>

The evidence & the stories don't match. In fact they totally prove that a 30.06 or any ballistic projectile or external explosive are physically impossible to fit the observable footage + acoustics + autopsy + behavior! Let's start with the physics: The Spine Destruction: The autopsy summary states six entire vertebrae (C2 through C7) were completely pulverized. A bullet traveling horizontally from a distant rooftop cannot cleanly hollow out a long vertical column of bone. But if you pass an intense electrical current down the spine, the wet bone matrix acts as a conductor. The water inside undergoes an instant phase change and

expands violently from within (adiabatic pressure damage), shattering the bone matrix. The 360-Degree Necklace Burn: There is a distinct flash-burn wrapping entirely around the neck where a metal chain sat, while the non-conductive shirt collar remains intact. A physical projectile would have snapped that chain and dragged metal shards deep into a mechanical wound tracking path. Instead, an intense electromagnetic pulse (EMP) interacts with that closed metal loop, forcing electrical currents to circulate through it (magnetic induction) and causing localized flash-heating directly against the skin. The Acoustic Truth: Audio engineer Jon Bray proved using cross-camera synchronization that the loud "crack" originated right at the podium zone, within a few meters of the microphones. If a shot came from a distant roof, you would hear two distinct sounds: the sharp snap of the supersonic bullet passing, followed notices later by the lower-frequency boom of the gun report. We only get a single, intense broadband clipping spike. That is the acoustic signature of Joule heating, the literal pop of the air cracking open as a high-voltage electrical discharge forms. The Instant Body Behavior: On the video footage, you can see the knees instantly clamp together as the body seizes rigid. A bullet destroying the spinal cord cuts the brain's signals, causing the body to drop limp. The instantaneous, uniform locking of major muscle groups is a classic indicator of forced muscular tetany which is the direct physical reaction of tissue trapped inside a high-current electrical dump. The Remote Internal Bleeding: The medical summary documents severe hemorrhaging far away from the neck inside both lungs, the heart sac, & the subarachnoid space of the brain. A localized bullet to the neck cannot cause this multi-cavity trauma. But a pulsed electrical dump instantly expands internal fluids, sending a violent hydraulic shockwave (barotrauma) ripping through the vascular pathways like a water-hammer effect, bursting delicate capillaries in the chest & head simultaneously. The Reality: The target was caught inside an engineered electrical circuit. The visual "air puffs" seen on video act as the pre-ionization leader channels mapping out the path, while the staging gear serves to ground the circuit. Once the energy dumped, the operation transitioned to Signature Management to protect the true nature of this technology. The rapid post-event teardown and removal of the platform microphones & hardware ensured that independent civil forensic teams could not perform detailed electronic or structural analysis on the staging ground. The security team swapped into sterile hospital scrubs to eliminate material traces, & the bullet fragments were introduced after

the fact during the unmonitored SUV transport to the hospital, giving the public a traditional sniper narrative that easily fits a standard courtroom box. They manicured the timeline, but they cannot change the laws of physics. It's our job to NOTICE THE DETAILS THEY THINK ARE INVISIBLE!!!

Google trends, autopsy summary, site set up, all video footage are consistent with the hypothesis that Charlie Kirk was assassinated via a hidden high-voltage electrical system activated by a rooftop RF antenna, which charged a capacitor bank under or near the stage. The initiation caused the audible microphone hum while Hunter was talking. When the hum faded to a flat tone, high-frequency microwave lasers from infrastructure and speaker equipment ionized thin lines of air into plasma channels—conductive paths that act as invisible wires—timed to guide the high-voltage dump into the targeted area at Charlie. The system discharged when Charlie gripped the corded microphone with both hands, closing the circuit through his body. The dump produced a rapid magnetic-field change, which induced current in the necklace and launched an internal thermoelastic shockwave that erupted from the left anterior neck. The body stayed flexed after spinal-cord transection because residual current in his tissues continued to fire motor nerves and muscle while it grounded through the return path: the modified chair with rubber grips removed, the raised platform, and the dirt that is now missing. The platform audio matches this electrical dump: a brief high-frequency snap that clips wired channels by induction and then cuts off, which is not the long gas tail of a chemical explosion or the delayed two-part arrival of a rifle from about 120- 140 yds away!

....

Weitere Schüsse oder Atrappen, Pseudo Schützen zur Ablenkung:

Einer deutlich im Bild bei entlichen Vids die von der Linken seiten von Charlie nach rechts gefilmt haben: Ein Mann in der Nähe (ca.10m) an der Abschränkung mit einer als Smartphone getarnten Pistole. Bewegungen wie synchron zum Schuss. Eventuelle ein Auslöser, oder eine Ablenkung zur Verwirrung.

....
